

Hereby I object to any plans of the FCC to lessen
Indiana's current Telephone Privacy law protections.
I am currently receiving about 20 unwanted solicitng phone calls per week,
some of them after 8 PM on weekdays or even on weekends!
From friends I learned about the possibility to protect myself
against these phone calls by signing up to a Telephone Privacy
List based on the current Indian Privacy Law.
Doing so had reduced the number of unwanted phone calls considerably for my
friends.
I am hoping to experience the same improvement of living standard for myself.
However, this would be in vain, if the FCC decides to preempt state law.
